Signs and Symptoms of Exposure: Direct eye contact with skin and eyes will result in skin and eye damage and/or severe irritation. Ingestion of concentrate may cause burning pain in mouth, throat, abdomen.

Medical Conditions Generally Aggravated by Exposure: No effects indicated.

Emergency and First Aid Procedures: In case of contact immediately flush eyes or skin with plenty of water for at least 15 minutes; hold eyelids apart to ensure rinsing of entire surface of eye and lids. Get immediate medical attention. Remove contaminated clothing and shoes. Wash clothing and decontaminate shoes before reuse. If swallowed drink promptly a large quantity of milk, egg whites, gelatin solution; or if these are not available drink large quantities of water. Avoid alcohol. Do not induce vomiting. If vomiting occurs, give fluids again. Have physician determine if patient's condition allows for induction of vomiting or evacuation of the stomach. Do not give anything by mouth to a convulsing or unconscious person. Get immediate medical attention. Inhalation: Remove from area to fresh air. Seek medical attention if respiratory irritation develops or breathing becomes difficult.

SECTION VII – PRECAUTIONS FOR SAFE HANDLING AND USE

Steps To Be Taken In Case Material Is Released Or Spilled: Corrosive material. Floors may become slippery with standing liquid. Wear appropriate protective gear and respiratory protection where mist or vapors of unknown concentrations may be generated (self-contained breathing apparatus preferred). Dike and contain spill with inert material (sand, earth, etc.) and transfer liquid and solid separately to containers for recovery or disposal. Keep spill out of sewers and open bodies of water.

Waste Disposal Method: Observe all applicable federal, state and local requirements regarding disposal. Waste from normal product use may be sewer to a public owned treatment works (POTW) in compliance with applicable federal, state and local pretreatment requirements.
